To Whom It May Concern:

I am writing this letter in support of Greg Danas of G&G Firearms, in his pursuit to as a qualified expert witness in the filed of ballistics in the State of New York.

I am a court appointed attorney in Massachusetts in the areas of Criminal Law, the Care and Protection of Children, Children in Need of Services and Mental Health Litigation. I, also, practiced law in New Mexico as a Child Support Enforcement attorney.

Over the course of my practice I have had occasion to use Expert Testimony for purposes of Establishing Paternity, showing whether or not a patient should be committed to a Psychiatric Hospital and whether or not an item is or is not a Dangerous Weapon or firearm in a Criminal case.

I had the privilege of working with Mr. Danas in a Massachusetts Case to answer the question as to whether or not a Paint Ball Marker is a firearm or other Dangerous Weapon pre-se.

Mr. Danas was the key witness as a Ballistics Expert in providing the Court with the proper Expert Testimony laying a foundation for the Court to come to the conclusion that the Paint Ball Marker is not a Firearm or other Dangerous Weapon per-se.

In order to accomplish the job, Mr. Danas was required to testify on direct

examination as to all the statutory definitions and language in the statutes which, provides guidance in the determination of what constitutes a Firearm or other Dangerous Weapon per-se pursuant to Massachusetts Law.

Mr. Danas was a highly effective Expert Witness. He was the most knowledgeable person I have worked with in this field. Mr. Danas presented himself in the most professional manner and appearance.

Testimony throughout both Direct and Cross Examination of Mr. Danas was clear, concise and accurate in all respects. Mr. Danas handled questions from the Bench with the utmost respect and means of clarification, resulting in the judge stating that it was very clear that Mr. Danas was an expert in the field of Ballistics.

I highly recommend Mr. Danas as an Expert in the fields Ballistics and firearms technology, design, use and manufacture.

Sincerely yours,

Francis J. Sullivan Jr.
